Executive Summary

This report provides an update on progress made in Year 1 (January 1 to December 31, 2020) of the 2020-2022 Williamson County Community Health Improvement Plan (CHIP) and documents the collective impact of the community in improving the health of the county. The progress report incorporates feedback and lessons learned from community partners and the Healthy Williamson County (HWC) coalition during the first year of the community health improvement process.

The HWC coalition authored the 2020-2022 CHIP in response to the 2019 Williamson County Community Health Assessment. The improvement plan details the goals, objectives, and strategies to improve Williamson County’s top five health priorities. The HWC coalition working groups developed action plans that are aligned with the top five health priorities:

1. Behavioral health, stress, and well-being
2. Chronic disease risk factors
3. Social determinants of health
4. Access and affordability of healthcare
5. Building a resilient Williamson County

Due to Covid-19 response, community partners and the HWC coalition were not able to implement many action steps in the CHIP throughout 2020; However, some progress has been made since working groups have still met remotely every other month to network, collaborate, share best practices, and participate in the community health improvement process during the last half of the year.

Key Performance Indicators: The CHIP consists of 39 short-term indicators used to measure performance. Six indicators (15%) improved compared to their previous value. One indicator (3%) measured the same as their previous value. Twenty-four indicators (62%) were not started. Four indicators (10%) measured lower than their previous value. Three measure (8%) was baselined. One measure (3%) was achieved.

1 Achieved	6 Improved over baseline	4 Not Improved over baseline	1 Same as baseline	3 Identified baseline	24 Not started

Strategies: As of December 2020, the HWC coalition has achieved 11 strategies (10%) and progressed on 16 out of 115 strategies (14%). The HWC coalition has not started on 88 strategies (76%).

Introduction

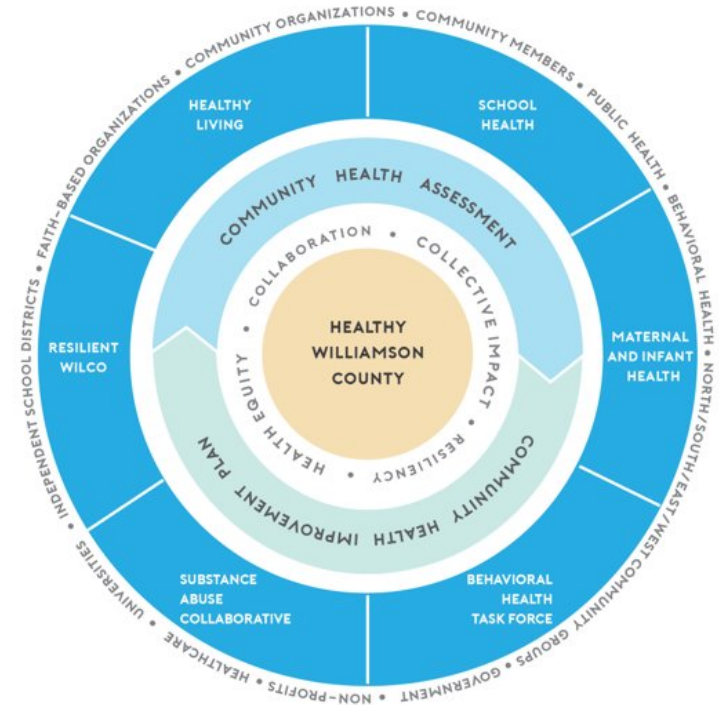

Thank you to our community partners for their continuous effort to address the Top Five Health Priorities in Williamson County.

Together, Healthy Williamson County coalition members collaborate to better serve the community. In 2020, the Healthy Williamson County coalition experienced many obstacles due to the COVID-19 pandemic. Despite having limited time to meet and work on interventions this year, numerous items in the 2020-2022 Williamson County Community Health Improvement Plan (CHIP) are in progress. This is a testament to how dedicated organizations and community members are to improving the health and well-being of the community.

The 2020-2022 CHIP serves as a roadmap for Williamson County community partners to address the Top Five Health Priorities. In a three-month span in 2019, Healthy Williamson County held 20 planning meetings to develop goals, objectives, and strategies for the three-year plan. In total, 125 partners, representing 60 organizations, worked together to develop a plan that consists of 30 objectives to make Williamson County the healthiest community in Texas.

We strive to include diverse organizations and partners in our efforts to improve the health of our community. If you are interested in joining a working group in the Healthy Williamson County coalition, visit the www.healthywilliamsoncounty.org website to join the coalition.

We look forward to collaborating with new and existing organizations and community members to move Williamson County toward being the healthiest county in Texas.

THANK YOU!

- Your Healthy Williamson County Team

Conclusion and Next Steps

The Healthy Williamson County Coalition thanks the 140 active working group members and 74 organizations (data not including the Behavioral Health Task Force or Child and Youth Behavioral Health Task Force) for their hard work during the first year of the community health improvement plan. Due to Covid-19 response, community partners and the HWC coalition were not able to implement many action steps in the CHIP throughout 2020; However, the groups made some progress as they met remotely every other month to network, collaborate, share best practices, and participate in the community health improvement process during the last half of the year. The working groups and community partners are excited to get back to regular meetings and transition back to in-person meetings (as safety allows). In 2021, working groups look forward to picking up some of the action items that were delayed due to the pandemic.

Next steps for working groups include the following activities:

- The Behavioral Health Task Force looks forward to meeting more regularly and will strive to make progress towards filling gaps identified by the SIM report. Additionally, the group will continue to work with the four precincts to receive accurate and timely suicide-related data.
- The Child and Youth Behavioral Health Task Force will strive to make progress towards filling gaps identified in the SIM report. The group looks forward to hosting the annual Mental Health in Schools Conference.
- The LifeSteps Coalition is excited to work on opioid, alcohol, marijuana, and tobacco prevention efforts. Lifesteps Coalition is excited to launch SAY WHAT tobacco-prevention peer groups in Williamson County schools and looks forward to engaging more youth to better understand underage behavior related to drug use.
- The Maternal and Infant Health working group will focus on improving the mental health of mothers by identify and assessing gaps, training providers, and developing peer support groups.
- The Healthy Living working group will continue to seek out health education opportunities and share opportunities and resources with the community. Additionally, the group looks forward to promoting the www.healthywilliamsoncounty.org community calendar and Aunt Bertha resource finder.
- The School Health working group will begin to meet again post-pandemic to work on identifying resources and providing services to students.
- The Resilient WilCo working group will continue to provide NEAR Science trainings to adults and will host a training to add new Resilient Wilco presenters.
- Williamson County and Cities Health District will continue to work towards improving access to community resources and building resiliency in the community.

The accomplishments, challenges, and lessons learned in Year 1 will inform Year 2 of the community health improvement process. In 2021, the working groups will work to move all strategies to in-progress or achieved and will continue to monitor performance of Key Performance Indicators.
